# Subject Index

Volume 8, 1986

- Acquired immune deficiency syndrome (AIDS), DNA image cytometry, 19
- Adenoma, follicular of thyroid, differential diagnosis by marker features, 195
- Allergies, drug, lymphocyte chromatin activation detected by polarization microscopy and cytophotometry, 63
- Anemia, refractory with excess of blasts, SAMBA 200 quantitative analysis of blast cells, 281
- Antibodies, intermediate filament, use as tissue-specific probes in FCM analysis of tumors, 271
- Architecture, nervous system, 3D reconstruction and quantification, 108
- Array processor, CLO, in biomedical image processing, 131
- BASIC** computer language program for stereologic pointcounting, 75
- Biologic data, computergraphic presentations, 89
- Bladder, cancer  
  Computer image analysis diagnosis system, 177  
  Detection using SAMBA 200 cell image processor, 187
- Bone  
  Remodeling of trabecular, morphometric parameters, 333  
  Renal-insufficiency osteopathy, morphometry, 250
- Bone marrow, human, granulocytic cell lineage, SAMBA 200 analysis of blast cells in refractory anemia, 281
- Breast, cancer  
  Evaluation of elastosis as prognostic factor, 259
- Image cytometry in malignancy grading, 293
- Cancer**  
  Bladder  
    Computer image analysis diagnosis system, 177  
    Detection using SAMBA 200 cell image processor, 187  
  Breast  
    Evaluation of elastosis as prognostic factor, 259  
    Image cytometry in malignancy grading, 293  
  Prostate, automated DNA diagnosis and grading, 152
- Carcinoma**  
  Follicular of thyroid, differential diagnosis by marker features, 195  
  Lung, classification by nuclear image analysis, 301  
  Squamous-cell cervical, prognostic significance of DNA distribution, 148
- Cell image analysis, high resolution (see image analysis)
- Cells**  
  Blast in refractory anemia, SAMBA 200 quantitative analysis, 281  
  Extranodal specialized sinoatrial, morphometry, 255  
  Granulocytic in bone marrow, SAMBA 200 analysis of blast cells in refractory anemia, 281  
  Immunoglobulin-containing in GI pathology, morphometric quantitative analysis, 314  
  Mitotic mammalian in synchronous culture, image analysis identification, 138  
  Visually normal cervical intermediate, masking effect of hormonal contraceptives on discriminating quantitative features, 227
- Cellular-logic operations (CLO), application in biomedical image processing, 131
- Cervix, uterine  
  Smears, masking effect of hormonal contraceptives on discriminating features, 227  
  Squamous-cell carcinoma, prognostic significance of DNA distribution, 148
- Chromatin  
  Activation in blood lymphocytes, detection by polarization microscopy and cytophotometry, 63  
  Markers of thyroid malignancy in histologically normal tissue, 168
- Chromosome protein, dependence on total metaphase protein, 224
- Chromosome damage, micronuclei assay, automation of, 219
- Colchicin, effect on dermal fibers, computerized morphometric analysis, 321
- Collagen, myocardial in volume overload hypertrophy, automated image analysis of pattern, 326
- Color, local similarities in cell images, use in scene segmentation, 25
- Computer/personal computer (PC)  
  Biomedical, proposal for open architecture for systems, 128  
  MicroTICAS system for DNA ploidy studies  
    Hardware design, 8  
    Software design, 1  
  Software for stereologic evaluation of sympathetic ganglia, 71
- Computergraphics  
  Biomedical, proposal for open ar-

- chitecture for systems, 128
- Presentation of biologic data, 89
- Use in cytologic and pathologic microscopy, 81
- Contraceptives, hormonal, masking effect on discriminating quantitative features in visually normal intermediate cells in cervical smears, 227
- Cultures, synchronous mammalian cells, image analysis identification of mitoses, 138
- Cytology
  - Semiautomatic microscopy in, 117
  - Use of computergraphics in, 81
- Cytometry, image (see also cytophotometry)
  - DNA ploidy in AIDS, 19
  - Malignancy grading of breast cancer, 293
- Cytophotometry
  - Detection of blood lymphocyte chromatin activation, 63
  - Diagnosis and grading of malignancy, algorithm for, 363
- Cytoscreening of conventional gynecologic smears
  - Analysis of eye movement, 210
  - Analysis of slide movement, 35
- DNA diagnosis and grading of prostatic cancer, 152
- DNA ploidy
  - AIDS, image cytometry, 19
  - Algorithm for cytophotometric diagnosis and grading of malignancy, 363
  - Assessment with microTICAS system
    - Hardware design, 1
    - Software design, 8
  - Hürthle-cell tumors, correlation with histopathology and clinical features, 158
  - Squamous-cell carcinoma of cervix, prognostic significance, 148
- Diagnosis, automated DNA of prostatic cancer, 152
- Drugs
  - Allergies, lymphocyte chromatin activation in, 63
  - Delivery to tumors, 3D microscopic study, 96
- Elastosis in breast cancer, evaluation as prognostic factor, 259
- Electron microscopy (EM), reconstructive 3D, use in biologic studies, 102
- Endometrium, atypical hyperplasia, nuclear morphometry for prediction of outcome, 46
- Eye movement in visual cytoscreening of conventional gynecologic smears, 210
- Fibers, elastic dermal, effect of Colchicine treatment analyzed by computerized morphometry, 321
- Filaments, intermediate (IF), antibodies as tissue-specific probes in FCM analysis of complex tumors, 271
- Flow cytometry (FCM) of complex tumors, use of IF antibodies as tissue-specific probes, 271
- Freeze fracturing, interphase nuclei, morphometric and topologic analysis, 343
- Ganglia, sympathetic, PC software for stereologic evaluation, 71
- Gastrointestinal (GI) tract, immunoglobulin-containing cells, morphometric quantitative analysis, 314
- Goiter, nontoxic of thyroid gland, morphometric investigation, 338
- Grading, malignancy
  - Algorithm for DNA-cytophotometric, 363
  - Automated DNA of prostatic cancer, 152
  - Breast cancer, image cytometry, 293
  - Ovarian tumors
    - Interpathologist and intrapathologist disagreement, 354
    - Interpathologist decision making, 349
- Granulomas in tuberculosis and sarcoidosis, morphometric distinction, 233
- Hardware, microTICAS cytophotometry system for DNA ploidy assessment, 8
- Heart, hypertrophy in pressure and volume overload, automated image analysis of myocardial collagen pattern, 326
- Histopathology, Hürthle-cell tumors, correlation with DNA ploidy, 158
- Hyperplasia, atypical endometrial, nuclear morphometry for prediction of outcome, 46
- Hypertrophy, cardiac in pressure and volume overload, automated image analysis of myocardial collagen pattern, 326
- IBAS system for interactive automatic image analysis, 267
- Image analysis, high-resolution
  - Assay for lymphocytes with micronuclei, 219
  - Automatic digital, identification of mitotic cells in synchronous culture, 138
- Biomedical
  - Cellular-logic operation system for, 131
  - Proposal for open architecture for systems, 128
- Digital nuclear, classification of lung carcinoma, 301
- IBAS interactive system, 267
- Myocardial collagen pattern in rat cardiac hypertrophy, 326
- SAMBA 200 Cell Image Processor, detection of bladder cancer, 187
- Segmentation by iterative region growing based on local color and global shape criteria, 25
- Semiautomatic, study of nervous system cytology, 117
- System for malignancy grading of breast cancer, 293
- Video, microcomputer system for, 201
- Video of cells in voided urine, diagnosis of bladder cancer, 177
- Immunoglobulin, GI tract cells containing, morphometric quantitative analysis, 314
- Liver, alcoholic steatosis, automated morphometric versus semi-quantitative estimations, 56

- Lung**  
 Carcinoma, classification by nuclear image analysis, 301  
 Regeneration of murine alveoli, stereologic study, 263  
 Lymph node smears in AIDS, DNA image cytometry, 19
- Lymphocytes**  
 Chromatin activation, detection by polarization microscopy and cytophotometry, 63  
 Micronuclei in, automated assay, 219
- Marker features, follicular adenoma and carcinoma of thyroid, differential diagnosis, 195**
- Markers**  
 Malignancy of thyroid, nuclear texture in histologically normal tissue, 168  
 Visually normal cells in cervical smears, masking effect of hormonal contraceptives, 227
- Melanoma, stage I malignant of skin, prognostic value of nuclear morphometry, 241**
- MicroTICAS**  
 DNA ploidy assessment system  
   Hardware design, 1  
   Software design, 8  
 DNA ploidy in Hürthle-cell tumors, correlation with histopathology and clinical features, 158
- Microcomputer system for video image analysis and diagnostic microdensitometry, 1, 8, 201**
- Micronucleus assay, automated system for, 219**
- Microphotometry, microTICAS system, DNA ploidy studies, 1, 8**
- Microscopy**  
 3D reconstructive  
   Computergraphic data displays, 89  
   Drug delivery to tumors, 96  
   Multimodal system for, 108  
   Serial electron micrographs, 102  
   Study of nervous system cytology, 117  
 Computer-assisted (semiautomatic) analysis of cell images, 117
- Phase-contrast image analysis, mitotic cells in synchronous culture, 138**
- Polarization, detection of lymphocyte chromatin activation, 63**
- Use of computergraphics in, 81**
- Mitoses in synchronous mammalian cell cultures, automatic image analysis identification, 138**
- Morphometry (see also stereology)**  
 Alcoholic liver steatosis, comparison with semiquantitative estimations, 56  
 Atypical endometrial hyperplasia, prediction of outcome, 46  
 Biomedical, proposal for open architecture for systems, 128  
 Bone, in renal-insufficiency osteopathy, 250  
 Computerized, dermal elastic fibers after selective staining, 321  
 Diagnosis of Sjögren's syndrome, 49  
 EM, freeze-fractured interphase nuclei, 343  
 Extranodal specialized sinoatrial cells, 255  
 Granulomas, sarcoidosis versus TB, 233  
 Granulosa-cell tumor of ovary, 245  
 Nuclei in stage I malignant melanoma, adjuvant prognostic value, 241  
 Quantitative, immunoglobulin-containing cells in GI pathology, 314  
 Thyroid gland, nontoxic goiter and other conditions, 338  
 Trabecular bone during remodeling, 333  
 Urinary tract, 358
- Nervous system**  
 Cytology, use of semiautomatic microscopy, 117  
 Structures, 3D reconstruction and quantification, 108
- Nucleus**  
 Freeze-fractured interphase, morphometric and topologic analysis, 343  
 Tube, 3D EM discovery, 102
- Osteopathy, renal-insufficiency of bone, morphometry, 250**
- Ovary**  
 Granulosa-cell tumor, morphometry in differential diagnosis, 245
- Tumors**  
 Disagreement in grading and typing, 354  
 Grading by different pathologists, 349
- Pathology, use of computergraphics in, 81**
- Ploidy/ploidy patterns (see DNA ploidy)**
- Point counting, stereologic, BASIC program for computer-assisted, 75**
- Polarization microscopy, detection of blood lymphocyte chromatin activation, 63**
- Probes, tissue-specific (see also markers), intermediate filaments, use in FCM analysis of tumors, 271**
- Prognosis (see also DNA ploidy)**  
 Breast cancer, evaluation of elastosis as factor, 259  
 Squamous-cell carcinoma of cervix, significance of DNA distribution, 148  
 Stage I malignant melanoma of skin, value of nuclear morphometry, 241
- Progression of malignancy, atypical endometrial hyperplasia, nuclear morphometry for prediction, 46**
- Prostate, cancer, automated DNA diagnosis and grading, 152**
- Protein**  
 Chromosomal, dependence on total metaphase protein, 224  
 Intermediate filament, antibodies used as tissue-specific probes in FCM, 271
- Regeneration, epithelial of pulmonary alveoli, stereologic study, 263**
- SAMBA 200 Cell Image Processor**  
 Detection of bladder cancer, 187  
 Quantitative analysis of blast cells in refractory anemia, 281

- Salivary gland, Sjögren's syndrome, morphometry in diagnosis, 49
- Sarcoidosis, granulomas, morphometric distinction from those of TB, 233
- Screening, conventional gynecologic smears
  - Analysis of eye movement, 210
  - Analysis of slide movement, 35
- Segmentation, scene, interactive region-growing process for, 25
- Sjögren's syndrome, morphometry in diagnosis, 49
- Skin
  - Elastic fibers, computerized morphometric analysis with selective staining, 321
  - Stage I malignant melanoma, prognostic value of nuclear morphometry, 241
- Slide movement in visual cytoscreening of conventional gynecologic smears, 35
- Smears
  - Cervical, masking effect of hormonal contraceptives on discriminating quantitative features, 227
  - Conventional gynecologic
    - Analysis of eye movement in visual cytoscreening, 210
    - Analysis of slide movement in visual cytoscreening, 35
- Software
  - Personal computer, stereologic evaluation of sympathetic ganglia, 71
- MicroTICAS cytophotometry system for DNA ploidy assessment, 1
- Staining, elastic dermal fibers, selective histochemical method for quantitative estimation, 321
- Stereology (*see also* morphometry)
  - Point counting, BASIC program for computer-assisted, 75
  - Regeneration in murine pulmonary alveoli, 263
  - Sympathetic ganglia, PC software for, 71
- Thyroid
  - Follicular adenoma and carcinoma, differential diagnosis by marker features, 195
  - Hürthle-cell tumors, correlation between DNA ploidy and histopathology, 158
  - Nontoxic goiter and other conditions, morphometric investigation, 338
  - Tumors, markers for malignancy in histologically normal tissue, 168
- Tissue
  - Liver in alcoholic steatosis, automated morphometric versus semiquantitative estimations, 56
  - Salivary gland in Sjögren's syndrome, morphometry, 49
- Tuberculosis, granulomas, morphometric distinction from those of sarcoidosis, 233
- Tumors
  - Drug delivery, 3D microscopic study, 96
  - Granulosa-cell of ovary, morphometry in differential diagnosis, 245
  - Ovary
    - Disagreement in grading and typing, 354
    - Grading by different pathologists, 349
  - Thyroid, markers for malignancy in histologically normal tissue, 168
- Ultrastructure, sympathetic ganglia, stereologic evaluation, 71
- Urinary tract (*see also* bladder and prostate), morphometry, 358
- Urine, voided
  - Image analysis of cells in sediment, diagnosis of bladder cancer, 177
  - SAMBA 200 analysis of cells in sediment, detection of bladder cancer, 187
- Video scanning, cells in voided urine sediment, diagnosis of bladder cancer, 177
- Video-based microphotometer, microTICAS, DNA ploidy studies with, 1, 8
